The diagram shows a window titled "Edit Screen" with a close button (X) in the top right corner. The window contains several sections:

- Explanation of getline Function**: A header section.
- Name of Function**: A field containing "getline".
- Definition File**: A field containing "Main.cpp".
- Definition Line Number**: A field containing "109".
- Declaration Format**: A field containing "int getline ( )".
- Outline**: A section containing:
  - 41 obtain line count of file
  - 42 Return Value
  - 43 line count of file
- Explanation of Parameter**: A field containing "nothing".
- Functional Explanation**: A section containing a list of four items:
  - 1) initialize variable
  - 2) count number of lines till EOF is detected
  2. 1)
  2. 1. 1)
  - 3) display line count on screen
  - 4)
